KEYWORDS

flood disaster, building point data, industrial classification, LSTM, multimodal data fusion, natural language processing

A Correction on
Efficient disaster damage prediction method using building point data and LSTM: a case of flood disaster

by Kabeyama Y, Kajitani Y, Ueno T and Yuyama A (2025). Front. Built Environ. 11:1631964. doi: 10.3389/fbuil.2025.1631964

The **Title** of this article was erroneously given as: Efficient Disaster Damage Prediction Method Using Building Point Data and LTSM: A Case of Flood Disaster. The correct **Title** of the article is Efficient Disaster Damage Prediction Method Using Building Point Data and LSTM: A Case of Flood Disaster.

The original article has been updated.
