identity, social context

A Correction on

[Impostor phenomenon short scale \(IPSS-3\): a novel measure to capture
impostor feelings in large-scale and longitudinal surveys](#)

by Jansen, M. P. (2024). *Front. Psychol.* 15:1358279. doi: 10.3389/fpsyg.2024.1358279

Leonhardt et al., 2025 was not cited in the article. The citation has now been inserted
in section “4 IPSS-3: a universally applicable IP instrument”, **paragraph 1** and should read:

“A preliminary short version of the original ISCQ called ISCQ-5 (ISF-K; Leonhardt
et al., 2025) was chosen as the base instrument for developing the IPSS-3 since it is
comparably short and recently developed. Furthermore, it is designed based on a scale
with a unidimensional factor structure and shows a highly positive correlation with another
established IP scale (CIPS).”

The complete reference can be found below:

Leonhardt, M., Klug, K., Kamsties, N., and Rohrmann, S. (2025). Kurzversion
des impostor-selbstkonzept-fragebogens (ISF-K): entwicklung und validierung
eines ökonomischen inventars zur erfassung des impostor-phänomens. *Diagnostica*.
doi: 10.1026/0012-1924/a000349
