KEYWORDS

water-energy-food nexus, NSGA-III algorithm, digital twin, collaborative optimization, irrigation district management, resource coupling system

A Correction on
Multi-objective collaborative optimization of water resources in Hebei irrigation areas: maximizing the benefits of the water-energy-grain nexus driven by the NSGA-III algorithm and verified by digital twins

by Huang, P., Jia, M., and Gu, F. (2025). *Front. Sustain. Food Syst.* 9:1701718. doi: 10.3389/fsufs.2025.1701718

Affiliation [College of Business, City University of Hong Kong, Hong Kong, China] was erroneously given as [School of Energy and Environment, City University of Hong Kong, Hong Kong, China].

The original version of this article has been updated.

In the **Acknowledgements**, Professor Tianyi Wang's affiliation was given as ["School of Business, City University of Hong Kong" instead of the correct "College of Business, City University of Hong Kong."].

Acknowledgments

We sincerely extend our gratitude to Professor Tianyi Wang (College of Business, City University of Hong Kong) for his invaluable guidance and profound feedback throughout the research process. His rigorous academic attitude has been instrumental in the completion of this research.

The original version of this article has been updated.
